EDUCATION

Lovely Professional University, Punjab

2022

B.Tech - Computer Science and Engineering | **CGPA: 8.15/10**

Punjab, India

P.C. Vigyan Mahavidyalaya, Bihar

2020 – 2022

Senior Secondary | **Percentage: 70.6%**

Bihar, India

SKILLS

Languages/Courses: C++, C, JavaScript, Python, HTML, CSS, SQL

Technologies/Frameworks: React, MongoDB, NodeJS, EJS, Rest APIs, Express, Git, GitHub

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming

PROJECTS

DSA Sheet - AI-Powered Learning Platform 🌐

June 2025 – August 2025

- Engineered and deployed a DSA learning platform integrating **5 specialized sheets** with **1000+ curated challenges**, providing real-time progress tracking, interactive mock tests, and adopted by **150+ users**.
- Integrated AI-driven doubt solving system using large language models to deliver contextual explanations and adaptive guidance, improving learning efficiency and user experience.
- Created a personalized dashboard to track overall progress, supported by a scalable backend and secure authentication, ensuring consistent performance and reliable data synchronization across devices.
- Tech Stack:** React.js, Node.js, Express.js, MongoDB

Meetly - Video Conferencing Web Application 🌐

January 2025 – March 2025

- Designed and deployed a full-stack video conferencing platform enabling **real-time video/audio calls**, **screen sharing**, and **group chat** for seamless virtual collaboration.
- Implemented a scalable signaling server with **dynamic socket management**, ICE candidate exchange, and peer presence detection for stable connectivity.
- Integrated **token-based authentication and session persistence** to enable personalized meeting histories and smooth reconnections across sessions.
- Tech Stack:** WebRTC, React.js, Node.js, Express.js, Socket.io, MongoDB

WanderStay - Full-Stack Room Booking Platform 🌐

October 2024 – December 2024

- Built a robust booking platform allowing users to **list, search, review, book, and manage properties**, following RESTful API design and modular MVC architecture for maintainability and scalability.
- Enhanced booking reliability by **60%** and maintained **data integrity** using atomic MongoDB transactions and Mongoose middleware for cascading deletion of associated reviews and bookings.
- Implemented secure authentication with Passport.js (Local and Google OAuth 2.0), session management via MongoDB store, and enforced role-based access control for protected operations.
- Streamlined property image handling by automating upload, storage, and optimization via Multer and Cloudinary, eliminating manual image processing.
- Tech Stack:** MongoDB, Express.js, Node.js, EJS, APIs

ACHIEVEMENTS

- Solved over **450+ DSA problems** on LeetCode, with a peak **rating of 1650+**.
- Earned a **1700+ rating** on GeeksforGeeks, demonstrating consistent problem-solving excellence.
- Secured **Institute Rank 151** on GeeksforGeeks among thousands of peers in competitive programming.
